Resource efficiency workshop

Last month, we informed you of our next internal event that will focus on resource efficiency, waste and recycling. Please note that very few seats are left so if you are representing one of our members and wish to attend, do not delay your registration. [Registration and agenda...](#)

2016 European demolition industry report

The European Demolition Association has published the second edition of this study, which mainly focuses on waste management. The nearly 400 pages report includes detailed information about the trends of the demolition industry, forecasts and data. [Read more...](#)

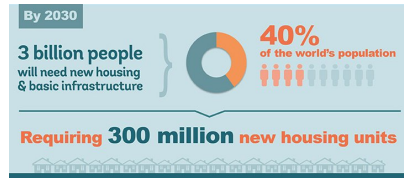

hEN and EAD lists in the OJEU updated

On 14th October the updated [list of EAD](#) was published in the Official Journal. Two weeks later the updated [list of harmonised standards](#) under the Construction Products Regulation was also published. In the table the references to EN 13383-1 (Armourstone), EN 14351-1 (Windows and doors) and EN 16034 (Pedestrian doorsets, industrial, commercial, garage doors and openable windows) include notes to explain additional rules to citation.

Citation of harmonised standards

Construction Products Europe is working to find solutions to the blockage of the citation of harmonised standards. Currently there are more than 100 standards published by

CEN and not cited in the Official Journal. In addition to the meetings between CEN Technical Committees, CEN CENLEC Management Centre and the EC we are also working in action 5 of the Joint Initiative on Standardisation to find solutions to some of the reasons for blockage, in particular the introduction or revision of classes and thresholds but also other issues such as dangerous substances clauses or pass/fail criteria declaration.

CEN/TC 350 Plenary meeting 2016

CEN/TC 350 experts will meet in Berlin next week to review the outcome of the working groups and the future of the standardisation system for the assessment of sustainability of construction works. The revised Mandate M/350 and its implications on the revision of EN 15804 and other standards will be the most important topic on the agenda

Hazard and safety information for use by Poison Centres

EC will harmonise hazard and safety information for use by Poison Centres. This will become an obligation for manufacturers of mixtures for consumers since 2020, for professional users since 2021 and for industrial users since 2024. [Read more...](#)

EC Consultation: resource efficient buildings

Construction Products Europe published a [position paper](#) to provide our approach to this important topic. Other organizations also published their own recommendations and positions. Some of them are: [Position of ACE/CAE](#), [Position of ANEC](#),
